Rahul Sharma

Product Manager (10+ yrs) | Developer Experience, Platforms & Search

Santa Clara County, CA | +1 (408)-800-3734 | message.rsharma@gmail.com | linkedin.com/in/rsharma-profile | v0-rahulsharma.vercel.app

Product Manager with 10+ years leading AI-enabled Platforms, Developer Experience (DevEx), and Search & Conversations (NLP) - building paved paths that unify how Engineers **Onboard**, **Build**, **Test**, and **Ship**.

- **Enterprise Scale** - Shipped 0-to-1 Platform capabilities across the Software Delivery Lifecycle (Source Code Management, Build, Test, Release, Deploy) - embedding automated Code Scanning, CI/CD, and Release Readiness gates for a 5,000 Engineer Org across PayPal brands.
- **0-to-1 AI Execution** - Launched and scaled a Gen-AI Search and multi-RAG Conversational Platform to ~50,000 Engineers at JPMC.
- **Measurable ROI** - Drove ~12-22% measured gains in Developer Productivity, Information Discovery, Search Relevancy, and Satisfaction, while averting a ~$2.5M USD regulatory penalty.

Took a deliberate pause to reflect, travel, and upskill in Agentic AI & Model Context Protocol (MCP) - now **starting to explore** PM **opportunities** in AI-enabled Platforms, Developer Experience, Responsible AI **or** Search.

RELEVANT EXPERIENCE

Staff Product Manager - Platforms & Developer Experience

Intuit Inc. *(**via** Magnit Global - Contract, 6 Months Fixed-Term), 2025 - 2026*

Drove **Platform & Dev Tools Strategy** and Change Management initiatives in partnership with Platform Leadership - advancing Developer Productivity, PDLC Efficiency, Time-to-Market, and Platform Governance at scale.

- **AI Assistant (Agentic)** - Defined requirements and led workflow design for an Agentic AI Conversational Support Assistant - leveraging Root Cause Analysis (RCA) data for LLM Reinforcement training and Assistant Skill enhancement, to drive Agentic ticket Workflow Management - enabling **~5% improvement** in Developer Productivity and **~7%** in Support Response SLAs, in early pilot trials.
- **SDLC, Time-to-Market & Developer Productivity** - Championed Developer Productivity visibility through DORA metrics and Dev Tools Health Dashboards - across Code, Test, Review and CI/CD workflows - supporting Shift-Left, Engineering Velocity and Time-to-Market goals. Helped establish annual **Secure Coding Compliance** enforcement via **GitHub** access controls.
- **PDLC Standards & Governance** - Drove Jira Cloud Platform Governance across **2000+ Workspaces** - standardizing Workflows, Work Types, and Configurations with **100% Compliance** - reducing cognitive load and improving PDLC predictability. Initiated and authored PRDs for Automated **AppSec Vulnerability Attributions** to **Code Owners** via Jira and for **VoC Planning** enhancements.

Founding Product Manager - Horology, Community & Marketplace Platform

Stealth Startup *(Bootstrapped), 2024 - 2025*

Co-founded **WatchAI** - an AI-enabled Platform unifying Editorial Content, Community Engagement, Marketplace, and AI-driven Insights (brand heritage, model history, pricing trends, personalized recommendations) for Watch Enthusiasts.

- Validated **Product-Market Fit** through **40+ User Interviews** and Usability Tests across Watch Community events, Enthusiast Network, and Watch Fairs - progressing from **Market Research** and **Hypothesis Validation** through **UX Prototyping** to **MVP v0.1** - before deliberately pausing the venture prior to fundraising.

Staff Product Manager - AI-powered Developer Experience, Search & Conversations (NLP)

JPMorganChase & Co.*, 2023 - 2024*

Led Product Strategy and end-to-end delivery for JPMC's **AI-powered Search**, **Conversations** (NLP), **Developer Portal** & Dev Tools - scaling Conversational Search to ~50,000 users **and** evaluating AI Developer Tooling, including GitHub Copilot, to accelerate **Developer Productivity** across **code**, **test**, **review**, and **observability**.

- Launched 0-to-1 **Gen-AI Search & Conversations experience** from **Beta** (1,000 users) to **GA** (~50,000) - delivering Semantic, In-Context & Conversational Search with Multi-RAG Ranking, Session Memory, and Compliance Guardrails (Mistral 7B, AWS OpenSearch, 26+ sources).
- Improved **Information Discovery** times by **~12%**, **Search Relevancy** by **~22%**, and User **CSAT** by **~15%** - reducing cognitive load and friction for Users, with the platform architected to scale to enterprise-wide search and knowledge discovery.
- **Integrated** a Conversational **Support Agent** (SRE) **into Search** experience - enabling Users to **manage** and resolve **Support queries without context switching**.
- **Prototyped** AI-powered Search & Conversations using **Lovable**, **Builder.io**, and **v0** - compressing concept-to-testable-artifact timelines and enabling rapid iteration with Engineering and Design partners.

Reason for Leaving - Role relocated to the East Coast.

Senior Product Manager - ML-Ops Platforms, Integrations & Developer Experience

Workday Inc.*, 2021 - 2022 (1.5+ Years)*

Led delivery of Workday's ARIMA-powered **ML-Ops Platform** - pivoting from script-based **Integrations** to **API-first Workflows** and **Dashboards** - serving Internal Operations, Hardware Planning, and External B2B Operator teams.

- Drove **~$50K** in **Quarterly Operational Savings** and **~15% Reduction** in **Operational Cycle Time** - by transitioning clients to an API-driven ML-Ops Platform delivering **demand forecasting**, **capacity optimization**, and **data governance**.

- Delivered API **Integrations** and **Dashboards** for three user groups - Internal **Operations** (rack optimization), **Hardware Planning** (COVID-era demand forecasting), and **External B2B Operators** (data security & movement tracking).
- Championed API-first Platform & DevEx Strategy, Data-driven Roadmaps & Product Practices (RICE / ICE / MoSCoW Prioritization, CABs, VoC) **and mentored** early-career Product Owners & PMs.

Reason for Leaving - Caregiving Break.

Senior Product Manager - Developer Productivity Platforms & Tools
***PayPal Inc**., 2016 - 2021 (5.5 Years)*

Led key pillars of PayPal's Internal **Developer Platform** (IDP) strategy, establishing a **paved path** for 5000+ engineers across **PayPal Brands** (PayPal, Venmo, Braintree, Xoom etc.) - unifying Code Scanning, Service Ownership, and CI/CD standards.

- **Code Scanning as a Service** (DevRunner) - Launched a **0-to-1** Platform (Python, Docker; CLI, APIs, Webhooks, CI, Listeners) delivering **Quality**, **Security** and **Compliance** scans across 7+ language stacks for **5000+ Engineers** and **4500+ Apps** across **4 Countries** - reducing Developer Distraction by **~13%**.
- **Release Readiness Platform** - Launched a **0-to-1 Production** Build **Gate** (Quality, Security, Compliance checks), **later leveraged** to satisfy a Luxembourg **Regulatory Auditor's Proof-of-Testing requirement** for Integration Tests - achieving **100% Adoption** and **GA** on a tight timeline to avoid a $2.5M USD penalty.
- **GitHub Governance** - Standardized **GitHub Release Organization** (GRO), **consolidating 4500+** Production **Repos out of ~75,000** into Capability-based Orgs. Enforced **Deployment Compliance** via **3-2-1 Branching** and **Block Push** (Peer Review) - ensuring code shipped only from **Approved Branches within GRO** - while building **Code Traceability** (Jira, GitHub, ServiceNow) and evangelizing **InnerSource** practices.
- **Additional 0-to-1 Platforms** - **System Qualities Dashboards** (DevXDash), **Ownership Platform** (GitHub / LDAP-based attribution), **Software Artifact Metadata Repository** (SAMR), Developer Portal's core UX Library.
- **Collectively, these platforms** drove ~15% improvement in Developer Velocity (YoY), ~13% in Product Quality (over 2 years), ~20% in Developer Satisfaction, and ~95% Artifact Ownership Accuracy - delivering $0.5M in savings (over 3 years) through reduced revenue loss and operational cost.
- Drove **Awareness**, **Brand Crowdsourcing**, **Adoption**, and **Onboarding** for Platform Products - utilizing **CABs, Tech Expos**, **Podcasts**, and a **Champions Network** - across US, EU, and APAC.

Engineering Program Manager & Scrum Master - Cloud PaaS
***Cisco Systems Inc**. (**via** GSSR Inc. - Contract, 1.5 Years Fixed-Term), 2014 - 2015*

Led **7 Scrum Teams** across two strategic **Cisco Cloud** initiatives, improving Delivery Predictability by ~21% through Capacity-Driven Planning and 3-Buckets Estimation.

- **Cisco Cloud Services** - Led 3 UI & API Dev Teams delivering the Cloud Console for an OpenStack-based public cloud product built to compete with AWS, GCP, and Azure - piloted with 2 Enterprise Beta customers in the EU.
- **Cisco Intercloud Fabric** - Led 4 Dev Teams (Hybrid Cloud Management System) building asset migration tooling across multiple Cloud Providers, enabling hybrid and multi-cloud workload portability.

ADDITIONAL EXPERIENCE

- **Apple Inc**. (**via** Yoh Inc. - Contract, Fixed-Term) | PM Consultant, Developer Experience | Surveys & Strategy Deck | *2022 - 2023*
- **Qualcomm Inc**. (3 Years) | Lead Software Quality Engineer & Scrum Master | Software & Infrastructure Apps | *2011 - 2014*
- **Tata Consultancy Services** (2.5 Years) | Senior Software Quality Engineer | Infrastructure, Apps & Retail POS | *2007 - 2010*
- **Quark Software Inc**. (2.5 Years) | Software Quality Engineer | Design, Publishing & Content Automation Suite | *2005 - 2007*

CORE COMPETENCIES

Product & Platform Strategy | Developer Experience (DevEx) | Developer Productivity & SDLC (CI/CD) | AI-powered Search & Product Development (LLMs, RAG, Agentic AI) | 0-to-1 Product Launches | Platform Adoption & Internal GTM | Cross-Functional Leadership | Agile Execution & Delivery | Stakeholder Management | Voice of Customer (VoC) | User Interviews & Surveys | Usability Testing

TECHNOLOGIES, TOOLS & METHODOLOGIES

- **Product Management** - JIRA, Slack, Confluence, MS Teams, Optimal Workshop, Lucidspark, Miro, Aha, Trello, Zoom, Dragonboat
- **Frameworks** - KANO, JTBD, RICE, ICE, MoSCoW, Personas & Journeys, Competitive Analysis
- **Data & Analytics** - SQL, SQL Server, Oracle, Mongo DB, BigQuery, Tableau, PowerBI, Adobe Analytics, Qualtrics, Mixpanel
- **Developer Platforms & Tools** - Backstage.io, Compass, Port.io, GitHub, Bitbucket, Jenkins, TeamCity, ArgoCD, Docker, Postman, Swagger, JFrog, Gradle, Maven, Ansible, REST APIs
- **Cloud & Infrastructure** - AWS, GCP, OpenStack, Kubernetes, Databricks, Kafka, Mesos, AWS OpenSearch, AWS Bedrock
- **AI/ML** - LLMs (Mistral, Claude, GPT, Gemini), MCP, Agents / Agentic AI, RAG, Embeddings, Vector DB, Arima, NLP, Langchain
- **AI & Design Tools** - Lovable, Vercel v0, Builder.io, Claude Code, Bolt.new, Cursor, OpenAI ChatGPT, Google Gemini, DeepSeek, Perplexity, GitHub Copilot, Figma

EDUCATION & CERTIFICATIONS

- **Carnegie Mellon University** (Pittsburgh, PA) - Masters, Information Systems Management (MISM)
- **University of Mumbai** (Maharashtra, INDIA) - Bachelor of Engineering (BEng), Computer Engineering
- **Certifications**: AI for Product Management (Pendo.io), Gen AI for Product Managers (Linkedin Learning), Introduction to GitHub Copilot (Microsoft Learning), Certified Scrum Product Owner (CSPO), Certified Scrum Master (CSM), ITIL v3 Foundation (EXIN)
